SHOWTIME

CLASSROOM GAMESHOWS

Teacher guide · version 1.8.3

Four whole-class revision games, inspired by classic TV quiz formats. One file, no internet, no logins, no installs.

The games

Over the Edge

Each correct team drops a counter down a lane; whatever it pushes over the edge is theirs. In the final the whole class plays for the £5,000 jackpot.

Outpace

The class is one runner. Pick a deal, answer your way home before the Hunter catches you, then beat the 90-second Final Sprint.

Category Clash

Teams take turns to pick a category and points value; everyone answers. Harder questions are worth more, and one hidden ★ tile is worth double.

Hex Hunt

Two halves of the class race to link their edges across a board of lettered hexagons. Each letter is the first letter of the answer (for a number, of the number said in words: 1236 is "one thousand", so O).

Mini whiteboards, no pupil devices. Every game puts new questions and ones a team got wrong first.

Getting started

1. Save **showtime-classroom-gameshows.html** on your computer and keep using that copy and browser.
2. Double-click it. Choose your **subject**, **exam board** and, for sciences, **Separate** or **Combined Science**. Under **Questions** tick your topics, or leave **Mixed**. Untick **Higher tier only** for a Foundation class.
3. Pick a game, choose the number of teams (2 to 6) and press **Start**. The game starts at once, so hand out whiteboards first.

Every question

1. The question stays up while teams write an answer. There is no countdown.
2. Press **Space** for "3, 2, 1, show me!".
3. Mark each team: tap its panel (or press its number) to toggle ✓/✗. **C** marks all correct. Confirm with **Space**.
4. The answer appears and the game moves on. **U** undoes a slip.

> **Team rule:** a team is correct only if its whiteboards agree on a correct answer, or if you judge it correct. You are the judge, so accept good alternatives.

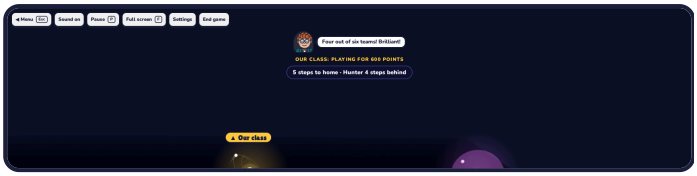

Each game takes about 10 minutes (Maths longer). **P** pauses, **F** is full screen. **End game** goes straight to the results. Every game ends with **Reteach these**: the questions most teams got wrong, with answers and topics, to plan your next starter. Nothing is recorded about individual students.

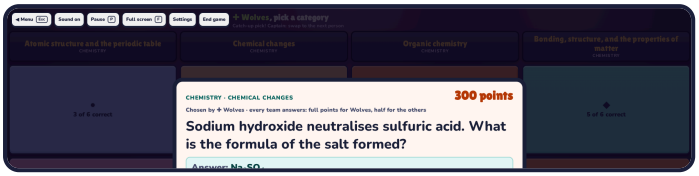

Game notes

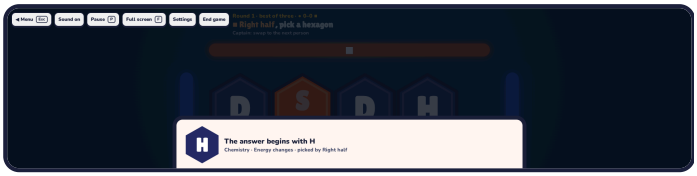

- **Outpace:** the class holds up 1, 2 or 3 fingers for **Cautious**, **Standard** or **Bold** and you press the majority. If more than half the teams are correct the runner steps forward; otherwise the Hunter gains. The Final Sprint clock starts only when you press Start.
- **Category Clash:** the choosing team wins full points, other correct teams half, and wrong answers lose nothing.
- **Hex Hunt:** after "show me", press the half with more right answers (**1** or **2**, or **N** for neither). It wins the hexagon and picks next. Split the class into two evenly matched halves.

In play

Settings

Large text suits the back of the room. **Reduced motion** turns off camera moves, shake, confetti and flashes. **Graphics: Low** suits older PCs. **Music** plays on the main screen only.

Privacy

> **No data leaves the computer.** Showtime makes no network connections: no analytics, tracking, accounts or adverts. Team names, history and settings stay in this browser only, and the school stays in control under UK GDPR. If you use pupils' names, use team names or initials rather than full names.

Troubleshooting

Problem	Try
The file opens as text or in a preview	Copy it to your computer, then double-click it. Email and OneDrive previews cannot run it.
"3D graphics are switched off", or it is jerky	Set **Graphics** to **Low**, close other tabs, or try another browser. Ask IT to turn on hardware acceleration.
